Pick and Choose

I had a conservative upbringing wherein the idea of being binary was inherent and somewhat drilled into us, children. Those were the underpinnings of a culture I had to take a hiatus from, when I came to America at 17 and my entire foundation of navigating identities was dismantled by my engagement at MSU. I started questioning but that only made me increasingly frustrated, as I had a conflict brewing inside me. At this time, a close friend of mine and a member of the MSU LGBTQ+ community told me something, that changed my entire perspective on having an intersectional identity. He said, "You need to pick and choose a person to love, not a gender" and that defined the rest of my experience at MSU.
